COMMITTED TO EXCELLENCE

JKP MICRO-MINERALS

About Us

Established in 2002, JKP Microminerals India Private Limited proudly brings over two decades of expertise in sourcing, processing, trading, and supplying exotic minerals across India. We specialize in procuring high-quality minerals from remote regions and ensuring their reliable, timely delivery at competitive value.

Driven by a forward-looking approach, we continuously adapt to evolving global market trends. Our experienced team focuses on strengthening distribution networks, improving operational efficiency, and maintaining consistent product quality. By managing the entire mineral value chain - from mining to processing - we ensure superior quality and provide customized solutions tailored to our customers' specific requirements.

JKP MICRO-MINERALS

Vision

To transform natural resources into prosperity and sustainable development.

Mission

To create value by seamlessly delivering raw materials at competitive prices that meet customer needs.

Values

- Life Matters Most
- Value Our Planet
- Do What is Right
- Improve Together
- Make it Happen

Mining to Micronizing

At JKP Microminerals, with over 25 years of industry experience, we aspire to become a leading global player in the mineral trading and processing industry through our unwavering commitment to operational excellence.

As part of this vision, JKP Microminerals has entered into strategic partnerships with companies actively engaged in the exploration, mining, and processing of minerals in Rajasthan, Gujarat, and other parts of India.

Plant & Machinery

JKP Microminerals India Private Limited operates 12 advanced micronizing and pulverizing plants with a total production capacity of over 22,000 MT per month. Each facility is tailored to the specific properties of the minerals processed, using dedicated milling systems for materials like dolomite, calcite, and barytes. The company delivers consistent, high-quality micronized products with particle sizes ranging from 25 microns to 1.8 microns, ensuring precision and reliability.

Our Products

Barytes

GCC

PCC

Kaolin

Talc

Dolomite

Bentonite

PE Wax

Calcined Clay

Hydrous Clay

Silica Powder

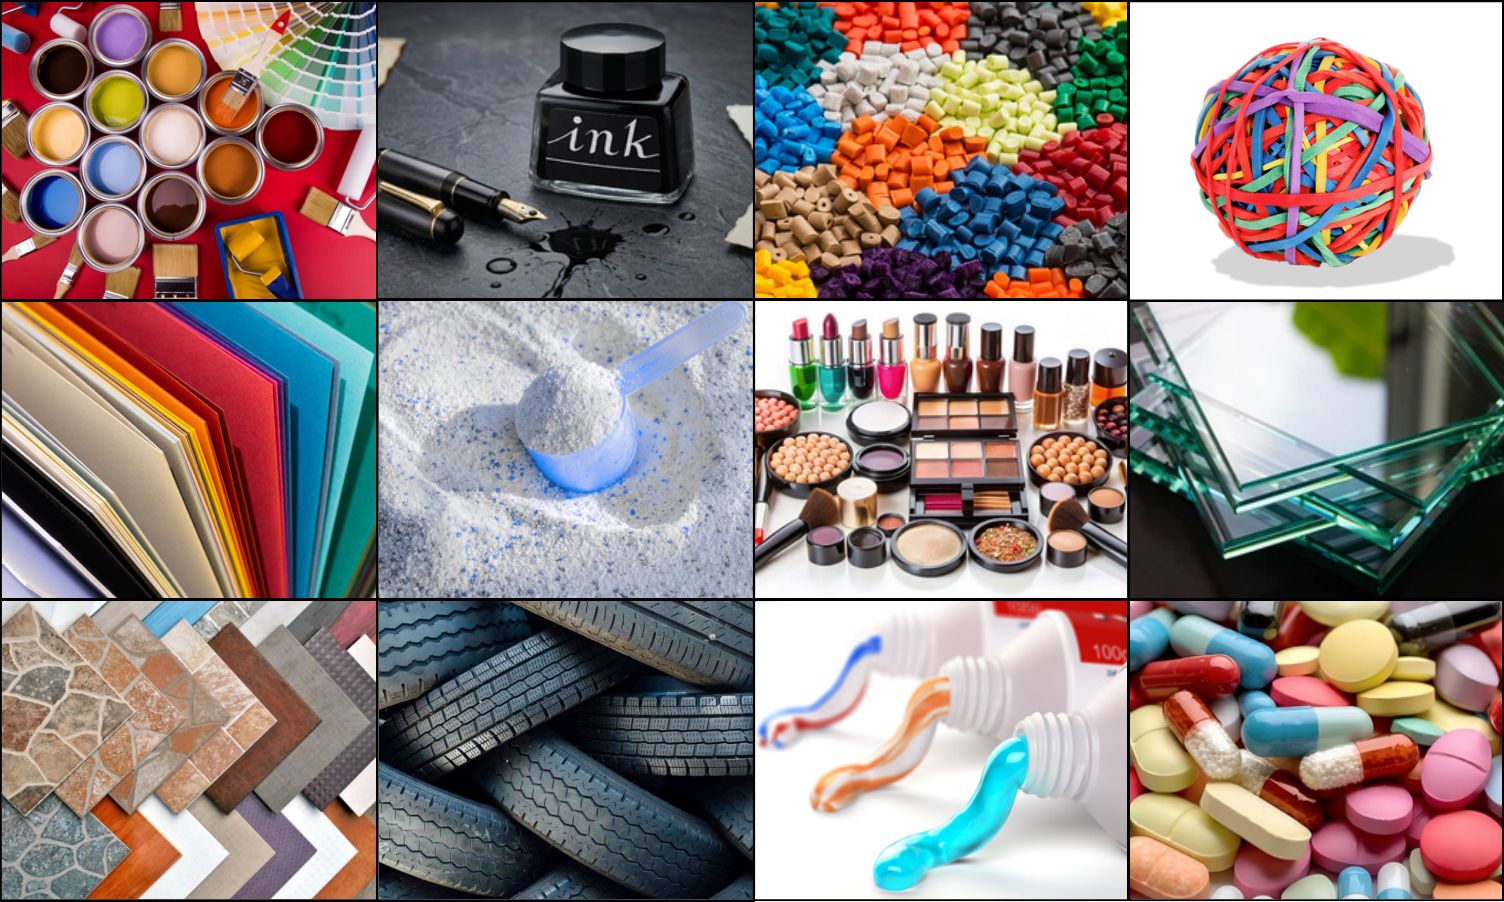

Silica Sand

Pigments

Red Oxide

Biosides

TiO₂ Replacement

Application of Our Products

Paints	Ink	Plastic	Rubber
Paper	Detergents	Cosmetics	Glass
Ceramic	Tyres	Toothpaste	Medicine

Our Processing

JKP MICRO-MINERALS

Processing

Processing units play a key role in sorting mined minerals for quality and removing impurities. Minerals are carefully inspected for quality and manually sorted before being pulverized. Separators are used to eliminate unwanted contamination, and the material is then crushed to achieve the desired particle size.

Storage Facility

With a storage capacity of more than 20,000 MT, JKP Microminerals India Private Limited recognizes that proper storage of finished goods is essential to maintaining overall product quality and service reliability.

We operate warehouses in Patalganga, Taloja, Vapi, Ahmedabad, Kolkata, Bhubaneswar, Bangalore, and Chennai.

Packaging

Finished products are packed in bags customized according to client requirements. The packaging protects the material from contamination caused by dust, water, and moisture.

To further ensure product safety, JKP Microminerals provides double-layer laminated bag packaging. These bags are then stacked in closed warehouses to protect them from adverse weather conditions.

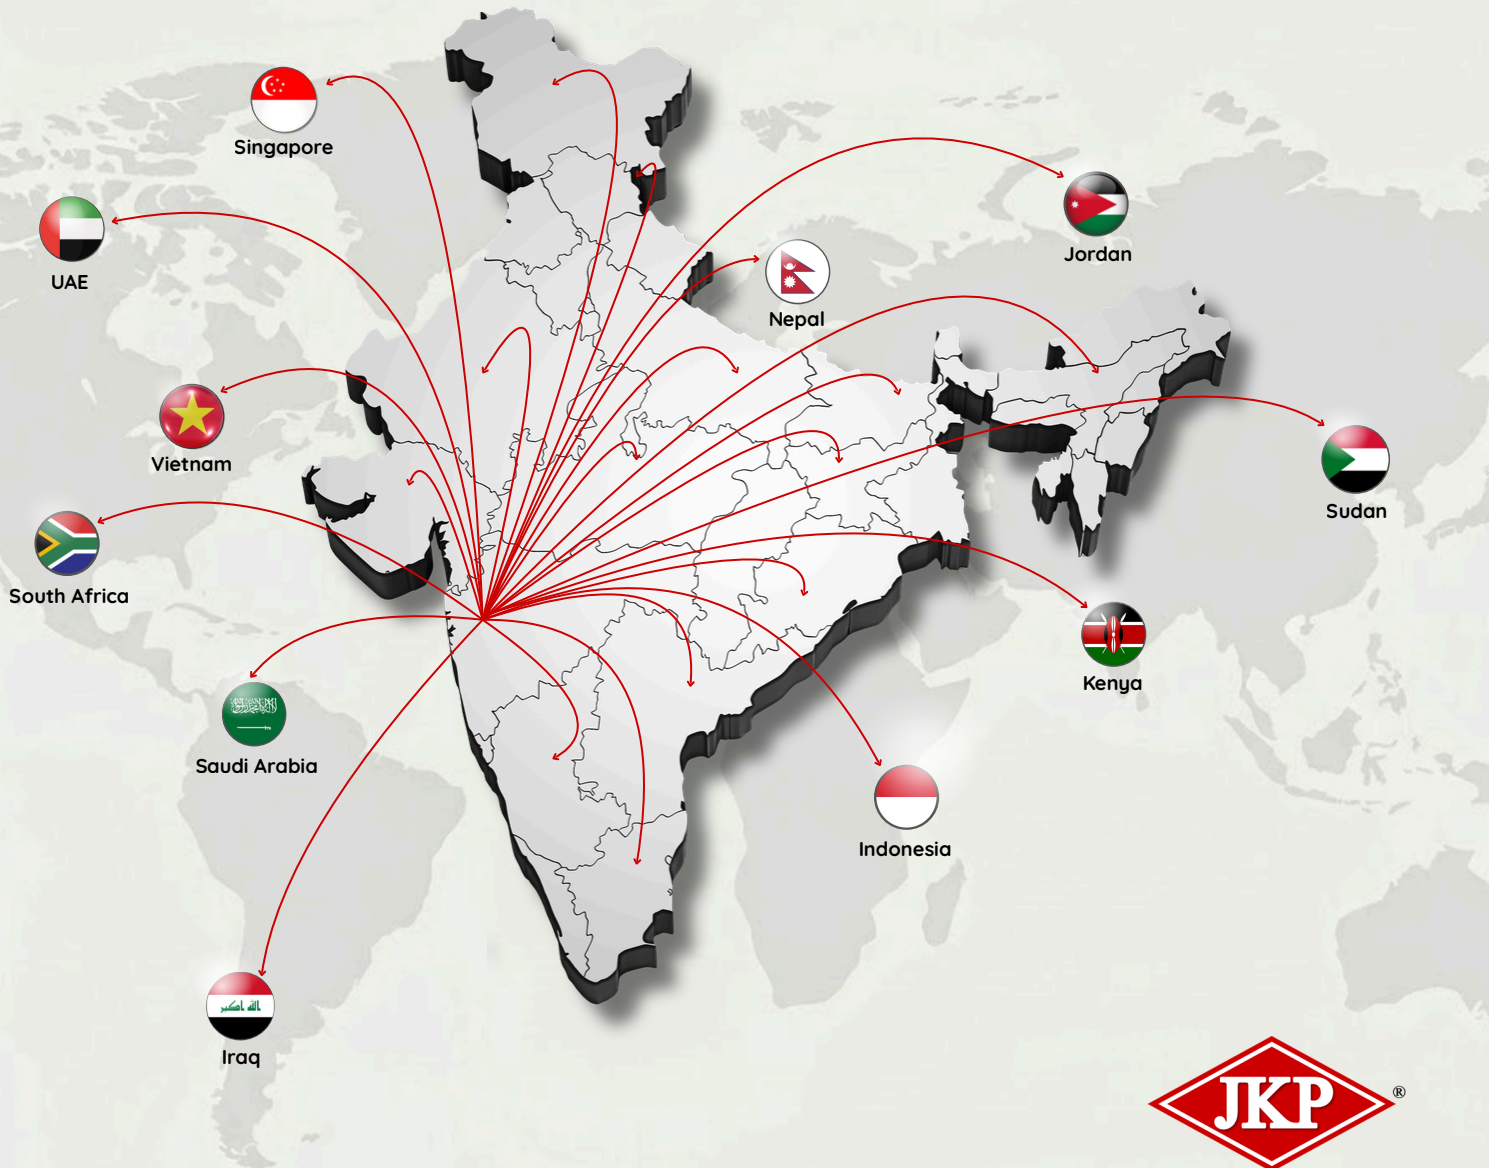

Logistics

At JKP Microminerals India Private Limited, we believe in building partnerships rather than simply acting as vendors. Our responsibility does not end when our materials reach our customers' premises. We actively support our customers by managing logistics requirements and monitoring inventory levels of our products at their facilities, helping ensure uninterrupted production and operational efficiency.
